Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15 and 27, drawn to interfaces attaches devices, classified in class 455, subclass 557.
 - II. Claims 16-18, drawn to transmitter and receiver at same station, classified in class 455, subclass 73.
 - III. Claims 19-26, drawn to data base application, classified in class 707, subclass 104.
 - IV. Claims 28-29, drawn to continuously variable indicating responsive, classified in class 340, subclass 870.16.

 - VI. Claims 31-34, drawn to radio system including private cordless extention, classified in class 455, subclass 462.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-V and VI are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as interface attached devices, transmitter and receiver at same station, data base application and as shown above in group I-VI. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
